Global

Proximus' expertise in Public Safety Communications

- Proximus is currently the partner for ASTRID in delivering :
 - Mission Critical Voice services on their own dedicated TETRA network operating (in consortium with Airbus) in the 380-400 MHz frequency band with specific features (e.g. group calls, Push to Talk...) (since 1998)
 - Broadband Data services on the commercial mobile network through “Blue Light Mobile” (MVNO), implemented by Proximus with roaming on the 3 Belgian networks (started with mobile data in BLM1.0 and extended to voice and SMS in BLM2.0) (since 2013)

- Blue Light Mobile services offers :
 - 1) high-availability, best coverage and resilient mobile voice and data communication service through national roaming
 - 2) Priority and preemption mechanisms for ASTRID customers e.g. QCl, ARP and Access Class Barring features

Other relevant Proximus' expertise

- Part of SAFIR consortium : to demonstrate integrated Drone Traffic Management for a broad range of drone operations in Belgium. The goal of the SAFIR project is to contribute to the EU regulatory process for drones and drive forward the deployment of interoperable, harmonised and standardised drone services across Europe.
- Be-Alert /SMS-alert
- ANPR
- PTT for business applications
- global mobile connectivity, seamless roaming experiences (via BICS)
