

Annex 1 to TD2Pi Tv3 cross connecting capability

Annex 1 provides informative details regarding sub-objective Tv3 – Cross connecting capability. TVC identified possible cross connecting test, which will be the start point for discussion between TVC and TvPoCs. **Initial informative details are purely informative for Contractors and in no way affects the evaluation of Offers for phase 3.**

1 a) Cross connecting of BroadWay solution (SpiceNet hub) of Contractor 1 with MC solution (server and client) of Contractor 2 and vice versa

(Connecting of one Broadway solution to another country/authority/agency)

2. b) Security: E2EE chain is achieved: MCPTT end user of Contractor 1 communicate with MCPTT end user Contractor 2
3. Country A group A1, country B group B1 and country C group C1 are combined on SpiceNet level
4. Group A1 from country A, moves to country C and harmonized QoS is achieved.
